IDenta STINGER

PROFESSIONAL DRUG
IDENTIFICATION KITS

The most accurate, easy-to-use drug detection kit on the professional market. Virtually No False Positives!

IDenta Stinger allows you to accurately identify suspected illegal substances, quickly and easily. IDenta's Stinger series is the ideal tool for the law enforcement community. Using advanced, internationally patented chemical technology, with fast and accurate results, IDenta Stinger will virtually eliminate the submission of false-positive samples to the forensic laboratory — a major cost savings and time benefit.

Marijuana/Hashish

Cocaine/Crack

Heroin

Ecstasy

Methamphetamine

For Professional Use Only*

IDenta

World Leader in
Forensic Products

Millennium Security Solutions specializes in drug identification products and training for law enforcement. We are a premier representative and manufacturer of IDenta Drug Identification Stinger Kits. Supplying the most advance technology in drug identification on the market today. We tailor your drug identification package specifically to your agencies needs. We work to accommodate your specific court and legal regulations when dealing with prosecution and chain of evidence issues.

The Stinger Series

Meeting the strict standards of the international law enforcement community, Stinger drug Identification kits are the perfect solution for daily multiple field tests. For professionals who need quick, on-the-spot results, the kits are compactly designed, convenient, safe and easy to use. The Stinger series by IDenta is a major innovation in providing determinative and cost-effective results in the field — unlike other products on the market, there are virtually no false positives!

The Stinger series uses chemical reagents that react with the substance in a closed, internal “test tube.” For most drugs, the identification is a two-
